

AMERICAN BULLFROG

(Rana catesbeiana)

**These voracious predators were introduced from the Eastern U.S.,
and now they are eating California's native frog species.**

CALIFORNIA NEWT

(Taricha torosa)

This orange and brown California native is under threat from invasive species that eat its eggs, such as crayfish released from bait shops and classrooms and mosquitofish released for pest control.

MOUNTAIN YELLOW-LEGGED FROG

(*Rana muscosa*)

Also known as the Sierra Madre yellow-legged frog,
government and zoo scientists are studying this endangered species.
